

“It’s Like The Ouija Board 2.0...  
Only **Safer**, And **More**  
**Powerful...**”

Six Boards, 74 Jinn Names, 6 Supreme  
Helpers and The Precise Conjunction To  
Turn ANY Novice Into A “*MacGyver of  
Magick*”.

From: The Temple of Nineveh Shadrach,  
To: Current and prospective students of magick,  
Dear Apprentice,

Yes, my use of MacGyver – the unique hero-genius of the show bearing his name – **to describe the magickal equivalent of what you could be** is very deliberate.

You see, MacGyver was a unique kind of hero.

His genius-level intelligence, proficiency in multiple languages, superb engineering skills, excellent knowledge of applied physics, military training in bomb-disposal techniques and preference for non-lethal resolutions to conflict meant that he could do seemingly everything “on the fly”, no matter what contingency he faced.

Now, could I get you to entertain the possibility... even if just for a few moments... of “suddenly” being known to your family and friends – including those who doubted you, slighted you, underestimated you... perhaps all your life – as that person **“that can do anything”**?

Imagine stepping out into that world as normal, unassuming, unremarkable, and then... when situation demands... suddenly striking like lightning.

Amazing people.

Creating miracles.

Making things happen in ways that couldn't possibly happen any other way.

Well, my apprentice, imagine this no more.

LIVE it instead. Daily.

Know it, feel it, taste it... as what inevitably happens when you belong to the cadre of rare human beings with “privileged access” to knowledge that's extremely hard to come by... unless you know where to look, and more importantly, **knew how to test for intensity and effectiveness.**

And as far as that is concerned, the results are in, and...

## **Knowledge Of Ibn Al-Nadim's "Jinn Rolodex" That Can Turn You Into a Magickal Juggernaut**

Here's what's remarkable about Ibn Al-Nadim's work – the same manuscript that I got the names of the 74 Jinn from.

It was not meant to be a magickal manuscript at all.

It was meant to be a glossary of references of religious and literary scholarly work up to and during the reign of the Abbasids.

That's why he called his work "*Al-Fihrist*" – literally "*The Glossary*".

And I wonder if he knew he had in his possession the names of some of the most powerful, effective, intense Jinn known to humankind.

Jinn whose mention predates the proven and powerful popular conjuration systems such as Birhatiah, the Sebaseb, Al-Buni's "Sun of Knowledge", and more.

Now here's the thing...

I've made it my own life's mission and passion to make knowledge of these majestic beings – and the capacity to work with them – as available for humans as possible... for over 25 years.

***Yet here, I was presented with a challenge.***

The Jinn, you see, are – much like human beings – their own individuals, with their own peculiar likes and dislikes.

And much as in human interactions, some Jinn will take a liking to you and help you. Others will simply not "mesh" with you personality-wise.

And so, a “shotgun” approach to evoking and working with them – indiscriminately **throwing** your demands at all of them to see what “sticks” – can be a recipe for being ignored... or worse.

I figured, rather than just dispensing with listing their names, putting together the “Golden Mean” for each of the names along with their corresponding knock-knock beats, and leaving you to your own devices, I decided to do one better.

I decided to come up with...

## **The Laser Gun Approach To Jinn Evocation!**

What does that mean?

It means you are going to easily, safely and effectively tap into your subconscious mind, with the utilization of a special kind of dice that you get to throw on a specifically designed “3d board”, to pin-point exactly the name of the Jinn you are going to work with.

But there’s more!

You are going to figure out the exact Jinn ruler to whom you will petition for that “lesser” Jinn’s aid, and also, the exact one of TWO powerful Watchers – angels mentioned in the Qur’an by name, and associated with powerful magick, namely “Harut wa Marut” (hence the name of this package) – to hold those specific Jinn helpers accountable for safety, accuracy and effectiveness.

Essentially, this is Jinn evocation without the risk or the guess-work.

This is magick made accurate, predictable, **powerful**.

How “powerful?”

Imagine drawing to you invisible aids that help you create...

- **Financial windfalls, in and out of upsets in the stock market or seasonal “slumps” in your marketplace...**
- *Taking your business from strength to strength, even after seemingly inescapable plateaus...*
- **Becoming more attractive and magnetic to the opposite sex, and more galvanizing in any social circle...**
- *Finding solutions seemingly “out of the blue” to problems whose solutions evaded you, perhaps for years...*
- **Acquiring new skills that aid and enrich your personal or professional life, giving you an edge you couldn’t have otherwise...**
- *Inspiring you with new creative ideas: A new vision, a lyrical new melody, a warm new prose that never touched human eyes or ears until now...*
- **Basking in a newfound general sense of well-being and physical vitality and strength...**
- ***And so much more!***

Listen, the adage ***“the more you learn the more you earn”*** is as true in magick as in the mundane.

And if you’ve been my student for any length of time and you’ve put anything I’ve put into practice, you’ll have experienced this first hand.

And I want you to experience all these promises I am making first-hand, too.

Which is why I’ve put together the ***Harut Wa Marut Divination and Conjunction System For “Reality Shifting”***.

Here’s what you are getting:

The instantly downloadable <b>“Harut Wa Marut Manual”</b> PDF, with clear step-by-step instructions –

along with the conjuration - on how to work the system. This is also provided in two translations: French and English.

Though you must hurry. The downloadable portion of this package – namely the knock-knock beats and the PDF – are not things I’d “run out of”; they are downloadable.

Yet the physical parts of this package, the dices and boards, do come in limited supply, and between my other expenses and the time it

takes to connect with my suppliers, I do not know how long it will be between running out and producing the next batch.

And, depending on the demand, there is every chance the price of future copies of this package will be higher.

So there is no time to avail of this introductory price as RIGHT NOW!

And here, I'll leave you with a question: When do you think would be a good time to turn into a MacGyver of Magick? 😊

I'll be awaiting for the answer – and for you - in the “students” area.

All my love and appreciation,

Nineveh Shadrach
